~ PIERCING AFTER-CARE INSTRUCTIONS ~

INSTRUCTIONS:

We recommend H2Ocean for most piercing after-care

- Take 1/4 teaspoon of non iodized sea salt to 8 ounces of distilled or bottled water
- Mix well, heat the water up to a temperature you can stand on your body. You can either soak entire piercing in the water until it is cold(the water). Rinse well with fresh water. Or you can soak a paper towel in the sea salt mix, and do a sea salt compress. Still soaking for about fifteen minutes

\*\*Do this once a day for the next three weeks or until the redness and irritation to the skin around the piercing is gone.

PLEASE CALL WITH ANY QUESTIONS OR CONCERNS! - 816-420-0987
